

BOOKS FOR CHILDREN WITH DISABILITIES

Books with textures, shaped books, books with finger puppets or books that make noises allow children with disabilities to explore books in a way that allows them to enjoy books while developing the pre-literacy skills that all children need.

The ages are not given for the books because the pediatrician, the parents, teachers and caretakers of a child with a disability should choose the book based on what their child needs and enjoys. It is not the age category that matters; it is a child's joy in a book that counts when selecting the best book for that child.

Some suggested titles to enjoy are:

Shaped Books:

- Bus DK Books
